

MAT: 3312 Homework assignment 6 (Regression Analysis)

Name: _____ Date: _____

Due: April 28th at 12:40. Upload to canvas.

The table below is from a sample of SBP of kids who are average height.

Age (x)	SBP ^a (y)	Age (x)	SBP ^a (y)
1	99	10	115
2	102	11	117
3	105	12	120
4	107	13	122
5	108	14	125
6	110	15	127
7	111	16	130
8	112	17	132
9	114		

Input the data above into SAS.

Question 1. Run a linear regression model to determine relating age to Systolic Blood Pressure. Paste output here (Analysis of Variance and Parameter estimate tables).

Analysis of Variance					
Source	DF	Sum of Squares	Mean Square	F Value	Pr > F
Model	1	1502.66912	1502.66912	1012.03	<.0001
Error	15	22.27206	1.48480		
Corrected Total	16	1524.94118			

Root MSE	1.21853	R-Square	0.9854
Dependent Mean	115.05882	Adj R-Sq	0.9844
Coeff Var	1.05905		

Parameter Estimates					
Variable	DF	Parameter Estimate	Standard Error	t Value	Pr > t
Intercept	1	97.78676	0.61816	158.19	<.0001
age	1	1.91912	0.06033	31.81	<.0001

MAT: 3312 Homework assignment 6 (Regression Analysis)

Question 2. Provide an interpretation of the parameter estimate for age.

1.91912 is the rate at which SBP is increasing compared to one year.

Question 3. Provide an interpretation of the parameter estimate for the intercept.

97.78676 is the SBP when the age is zero(new born).

Question 2. Test for the statistical significance of this regression line using the F test. What is the F-test statistics?

1012.03

Question 3. What is the p-value from the F-test statistics?

0.0001

Question 4. What is the conclusion for based on the p-value from the F test?

The fit of the intercept-only model is not equal to the linear model.

Question 5. Test for the statistical significance of the regression line using the t-test. What is the t-test statistics?

31.81

Question 6. What is the p-value from the t-test statistics?

0.0001

Question 7. What is the conclusion for based on the p-value from the t test?

There is a relationship between a child's age and their Systolic Blood Pressure.

Paste code here.
